The authors, Michael Liebreich and David Livingstone, are two of the world's leading experts on climate change and energy policy. They argue that decarbonization is not just an environmental imperative, but also an economic one.

The book is divided into three parts. The first part provides an overview of the science of climate change and the need to decarbonize the global economy.

The second part of the book describes the technologies and policies that are needed to transition to a clean energy future. The authors discuss the role of renewable energy, energy efficiency, and carbon capture and storage.

The third part of the book focuses on the economic benefits of decarbonization. The authors show that decarbonization can create jobs, stimulate economic growth, and improve public health.

The Decarbonization Imperative is a timely and important book. It provides a clear and concise roadmap for how to transition to a clean energy future. This book is essential reading for anyone interested in the future of the global economy.

### **Here are some key takeaways from the book:**

- Decarbonization is not just an environmental imperative, but also an economic one.
- The transition to a clean energy future will require a combination of technologies and policies.
- Decarbonization can create jobs, stimulate economic growth, and improve public health.

**If you are interested in learning more about the Decarbonization Imperative, I encourage you to read the book.**

It is a valuable resource for anyone who wants to understand the challenges and opportunities of the clean energy transition.
